

Safe Data Storage Data Centre Locations

Cloud Services only works with 100% uptime from the service provider, which is why we have always used Tier 2 rated data centres. We would love to say we own our own, but sadly not!. We collocate using a number of racks at two locations. We don't simply rely on one data centre to keep all our clients data safe, we also replicate all data to a second data centre.

City Reach London, hosts our Primary Data Store, then via a Layer Two 1Gbps interconnect, we replicate to our Second Data Store hosted in **County Gates** Data Centre in **Bournemouth**.

We only use our own Servers and Storage at both locations so you know exactly where your data is stored.

With Safe Data Storage you are assured of a safe, secure service with the knowledge that you will have support when you need it.

Specifications

- Tier 2 Rating
- Power - Minimum N+1UPS
- Cooling – Minimum N+1AC
- Backup Power – 24 Hour on site fuel
- Rack – PDU – Diverse A+B PDU's

Connectivity

- DDos Protection
- Multihomed IP Transit
- Layer 1 interconnects

Security

- Fire Suppression – VESDA Protection
- Entry System – Card and Pin Entry
- CCTV
- Access Procedure – Photo ID required
- Remote Hands On Support

Primary Site
City Reach
London

Replication Site
County Gates
Bournemouth
